Hypothesis/Commentary

Design Considerations for Genomic Association Studies: Importance of Gene-Environment Interactions.
Loïc Le Marchand and Lynne R. Wilkens ................................................................. 263

Commentary

UV or Not UV: Metals Are The Answer. Frank L. Meyskens, Jr. and Marianne Berwick ........................................... 268

Research Articles

Baseline Prostate-Specific Antigen Level and Risk of Prostate Cancer and Prostate-Specific Mortality: Diagnosis Is Dependent on the Intensity of Investigation. David Connolly, Amanda Black, Anna Gavin, Patrick F. Keane, and Liam J. Murray ................................................................. 271

V89L Polymorphism of the 5α-Reductase Type II Gene (SRD5A2), Endogenous Sex Hormones, and Prostate Cancer Risk. Inbal Boger-Megiddo, Noel S. Weiss, Matt J. Barnett, Gary E. Goodman, and Chu Chen ................................................................. 286

Large-Scale Evaluation of Genetic Variants in Candidate Genes for Colorectal Cancer Risk in the Nurses’ Health Study and the Health Professionals’ Follow-up Study. Aditi Hazra, Stephen Chanock, Edward Giovannucci, David G. Cox, Tianhua Niu, Charles Fuchs, Walter C. Willett, and David J. Hunter ................................................................. 311

DNA Methyltransferase and Alcohol Dehydrogenase: Gene-Nutrient Interactions in Relation to Risk of Colorectal Polyps. Audrey Y. Jung, Elizabeth M. Poole, Jeanette Bigler, John Whitton, John D. Potter, and Cornelia M. Ulrich ................................................................. 330
Short Communication

Exfoliated Cells in Stool: A Source for Reverse Transcription-PCR–Based Analysis of Biomarkers of Gastrointestinal Cancer. Ying Jie Yu, Adhip P.N. Majumdar, Jordan M. Nechvatal, Jeffrey L. Ram, Marc D. Basson, Lance K. Heilbrun, and Ikuko Kato .......................................................... 455

Letters to the Editor

How Statins May Increase Prostate Cancer. .......................................................... 459

ASPO Abstracts ........................................................................................................ 460

Information for Authors ......................................................................................... i–iv
