

Correction: Weight Change and Survival after Breast Cancer in the After Breast Cancer Pooling Project

In this article (Cancer Epidemiol Biomarkers Prev 2012;21:1260–71), which appeared in the August 2012 issue of *Cancer Epidemiology, Biomarkers & Prevention* (1), a typographical error was made in Table 4. The authors present HRs and 95% CIs by BMI and weight status, and in the results presented for underweight/normal weight in the Shanghai sample, the upper and lower 95% CI for $\geq 10\%$ weight loss are presented incorrectly as the same as for 5%–10% weight loss:

5%–10%: 1.74 (1.07–2.83)
 $\geq 10\%$: 4.08 (1.07–2.83)

The correct results are:

5%–10%: 1.74 (1.07–2.83)
 $\geq 10\%$: 4.08 (2.35–7.11)

The authors regret the error.
