REVIEW

1771 Risk Factors for Triple-Negative Breast Cancer among Latina Women
Laura Rey-Vargas, María Carolina Sanabria-Salas, Laura Fejerman, and Silvia J. Serrano-Gómez

RESEARCH ARTICLES

1784 Evidence for Etiologic Subtypes of Breast Cancer in the Carolina Breast Cancer Study
Halei C. Benefield, Emily C. Zabor, Yue Shan, Emma H. Allott, Colin B. Begg, and Melissa A. Troester

1792 Race/Ethnicity and Accuracy of Self-Reported Female First-Degree Family History of Breast and Other Cancers in the Northern California Breast Cancer Family Registry
Esther M. John, Alison J. Canchola, Meera Sangaramoorthy, Jocelyn Koo, Alice S. Whitemore, and Dee W. West

1802 Relationship between Diabetes and Diabetes Medications and Risk of Different Molecular Subtypes of Breast Cancer
Hongjie Chen, Linda S. Cook, Mei-Tzu C. Tang, Deirdre A. Hill, Charles L. Wiggins, and Christopher I. Li

1809 Calcium Channel Blockers and Risk of Lymphedema among Breast Cancer Patients: Nested Case-Control Study
Amanda J. Stolarz, Mrinmayee Lakkad, V. Suzanne Klimberg, and Jacob T. Painter

1816 Role of HPV Genotype, Multiple Infections, and Viral Load on the Risk of High-Grade Cervical Neoplasia
Rachael Adcock, Jack Cuzick, William C. Hunt, Ruth M. McDonald, and Cosette M. Wheeler; for the New Mexico HPV Pap Registry Steering Committee

1821 Vaccination of Young Women Decreases Human Papillomavirus Transmission in Heterosexual Couples: Findings from the HITCH Cohort Study
Michel D. Wissing, Ann N. Burchell, Mariam El-Zein, Pierre-Paul Tellier, François Coutlée, and Eduardo L. Franco

Douching, Talc Use, and Risk for Ovarian Cancer and Conditions Related to Genital Tract Inflammation
Iwona M. Gabriel, Allison F. Vitonis, William R. Welch, Linda Titus, and Daniel W. Cramer

Urinary PGE-M Levels and Risk of Ovarian Cancer

MCIR Variation in a New Mexico Population
Kirsten A.M. White, Yvonne T. Dailey, Dolores D. Guest, Kate Zielaskowskia, Erika Robera, Andrew Sassman, Keith Hunley, Christopher R. Hughes, Matthew R. Schwartz, Kimberly A. Kaphingst, David B. Buller, Jennifer L. Hay, and Marianne Berwick

Menopausal Hormone Therapy and Risk of Melanoma: A Nationwide Register-Based Study in Finland
Edoardo Botteri, Nathalie C. Stoer, Elisabethe Weiderpass, Eero Pukkala, Olavi Ylikorkala, and Heli Lyytinen

Association of BMI, Smoking, and Alcohol with Multiple Myeloma Mortality in Asians: A Pooled Analysis of More than 800,000 Participants in the Asia Cohort Consortium

ABOUT THE COVER

The cover image was adapted from Figure 1 in the article, "Evidence for Etiologic Subtypes of Breast Cancer in the Carolina Breast Cancer Study," by Benefield and colleagues. The authors evaluated clinical biomarkers and tumor suppressor p53 with risk factor data from cases and controls in the Carolina Breast Cancer Study, a population-based study of incident breast cancers. Figure 1 shows case–control odds ratios for ER/p53 and immunohistochemical intrinsic subtypes with P heterogeneity values. The study concluded that clinical marker–based intrinsic subtypes have established value, yet other schema may also yield important etiologic insights. For more information, see the article beginning on page 1784.
