## ABOUT THE COVER

The cover image is adapted from Figure 3B in the article, Discovery of a Pathogenic Variant rs139379666 (p. P2974L) in ATM for Breast Cancer Risk in Chinese Populations, by Guo and colleagues. The authors identified a missense variant (rs139379666, P2974L; AF = 0.09% for breast cancer cases, but none for controls) in the ATM gene for breast cancer risk using combing data from 7,204 breast cancer cases and 9,593 controls ( $P = 1.7 \times 10^{-5}$ ). For more information, see the article beginning on page 1308.
