**Tumor DNA as a Cancer Biomarker through the Lens of Colorectal Neoplasia**
Joshua D. Cohen, Brenda Diergaarde, Nickolas Papadopoulos, Kenneth W. Kinzler, and Robert E. Schoen

**Prostate Cancer Biomarker Development: National Cancer Institute’s Early Detection Research Network Prostate Cancer Collaborative Group Review**
Michael A. Liss, Robin J. Leach, Martin G. Sanda, and Oliver J. Semmes

**The Evolution of Our Understanding of the Biology of Cancer Is the Key to Avoiding Overdiagnosis and Overtreatment**
Kelly Hewitt, Jennifer Son, Alexa Glencer, Alexander D. Borowsky, Matthew R. Cooperberg, and Laura J. Esserman

**Autoantibodies in Early Detection of Breast Cancer**
Femina Rauf, Karen S. Anderson, and Joshua LaBaer

**Barrett’s Esophagus and Esophageal Adenocarcinoma Biomarkers**
William M. Grady, Ming Yu, Sanford D. Markowitz, and Amitabh Chak

**Biomarkers for the Early Detection of Hepatocellular Carcinoma**
Neelhar D. Parikh, Anand S. Mehta, Amit G. Singal, Timothy Block, Jorge A. Marrero, and Anna S. Lok

**Biomarkers for the Early Detection of Ovarian Cancer**
Robert C. Bast Jr, Zhen Lu, Chae Young Han, Karen H. Lu, Karen S. Anderson, Charles W. Drescher, and Steven J. Skates

**Biomarkers and Strategy to Detect Preinvasive and Early Pancreatic Cancer: State of the Field and the Impact of the EDRN**
Ying Liu, Sukhwindar Kaur, Ying Huang, Johannes F. Fahrmann, Jo Ann Rinaudo, Samir M. Hanash, Surinder K. Batra, Aatur D. Singh, Randall E. Brand, Anirban Maitra, and Brian B. Haab
TABLE OF CONTENTS

2524 Mesothelioma Biomarkers: A Review Highlighting Contributions from the Early Detection Research Network
Harvey I. Pass, Marjan Alimi, Michele Carbone, Haining Yang, and Chandra M. Goparaju

2541 The Potential of Circular RNAs as Cancer Biomarkers
Jason R. Brown and Arul M. Chinnaiyan

2556 Radiomics Improves Cancer Screening and Early Detection
Robert J. Gillies and Matthew B. Schabath

2568 Pitfalls in Cancer Biomarker Discovery and Validation with Emphasis on Circulating Tumor DNA
Annie H. Ren, Clare A. Fiala, Eleftherios P. Diamandis, and Vathany Kulasingam

2575 Adding Rigor to Biomarker Evaluations—EDRN Experience
Ziding Feng and Margaret S. Pepe

RESEARCH ARTICLES

Jessica Y. Islam, Marlene Camacho-Rivera, and Denise C. Vidot

2591 Premature Years of Life Lost Due to Cancer in the United States in 2017
Minkyo Song, Allan Hildesheim, and Meredith S. Shiels

2599 Strategizing Screening for Melanoma in an Era of Novel Treatments: A Model-Based Approach
Kemal Caglar Gogebakan, Elizabeth G. Berry, Alan C. Geller, Kemal Sonmez, Sancy A. Leachman, and Ruth Etzioni

2608 Daily Physical Activity and Symptom Reporting in Breast Cancer Patients Undergoing Chemotherapy: An Intensive Longitudinal Examination

2617 Associations of Leisure-Time Physical Activity and Television Viewing with Life Expectancy Cancer-Free at Age 50: The ARIC Study
Carmen C. Cuthbertson, Hazel B. Nichols, Xianming Tan, Anna Kucharska-Newton, Gerardo Heiss, Corinne E. Joshu, Elizabeth A. Platz, and Kelly R. Evenson

2624 Community-Acquired Escherichia coli Bacteremia after Age 50 and Subsequent Incidence of a Cancer Diagnosis: A Danish Population-Based Cohort Study
Kirstine K. Søgaard, Katalin Veres, Christina M.J.E. Vandenbroucke-Grauls, Jan P. Vandenbroucke, Henrik T. Sørensen, and Henrik C. Schønheyder

2633 Low Levels of Alcohol Consumption and Risk of Intestinal Metaplasia: A Cohort Study
Kyungae Kim, Yousoo Chang, Jiin Ahn, Hyo-Jooyang, and Seungho Ryu

2642 Methylated DNA Markers of Esophageal Squamous Cancer and Dysplasia: An International Study

2651 Extended HPV Genotyping to Compare HPV Type Distribution in Self- and Provider-Collected Samples for Cervical Cancer Screening

2662 HPV Types in Cervical Precancer by HIV Status and Birth Region: A Population-Based Register Study
Christina Carlander, Camilla Lagheden, Carina Eklund, Sara Nordqvist Kleppe, Mersur Dzabic, Philippe Wagner, Aylin Yilmaz, Kristina Elfren, Anders Sönnerborg, Pär Sparén, and Joakim Dillner

2669 Association between Receipt of Guideline-Concordant Lung Cancer Treatment and Individual- and Area-Level Factors: A Spatio-Temporal Analysis
Win Wah, Rob G. Stirling, Susannah Ahern, and Arul Earnest

2676 A Large Cohort Study of Body Mass Index and Pancreatic Cancer by Smoking Status
Eric J. Jacobs, Christina C. Newton, Victoria L. Stevens, Alpa V. Patel, W. Dana Flanders, and Susan M. Gapstur

2680 Replication and Genetic Risk Score Analysis for Pancreatic Cancer in a Diverse Multiethnic Population
David Bogumil, David V. Conti, Xin Sheng, Lucy Xia, Xia-ou Shu, Stephen J. Pandol, William J. Blot, Wei Zheng, Loic Le Marchand, Christopher A. Haiman, and Veronica Wendy Setiawan
The cover image is adapted from Figure 3 in the article, “Prostate Cancer Biomarker Development: National Cancer Institute’s Early Detection Research Network Prostate Cancer Collaborative Group Review,” by Liss and colleagues. The figure shows an MRI-Ultrasound Fusion-guided technique for targeted prostate biopsy. Prostate cancer remains the most common non-skin cancer and second leading cause of death among men in the United States. Although progress has been made in diagnosis and risk assessment, many clinical questions remain regarding early identification of prostate cancer and management. The early detection of aggressive disease continues to provide high curative rates if diagnosed in a localized state. Unfortunately, prostate cancer displays significant heterogeneity within the prostate organ and between individual patients, making detection and treatment strategies complex. Although prostate cancer is common among men, the majority will not die from prostate cancer, introducing the issue of overtreatment as a major concern in clinical management of the disease. The focus of the future is to identify those at highest risk for aggressive prostate cancer and to develop prevention and screening strategies, as well as discerning the difference in malignant potential of diagnosed tumors. The Prostate Cancer Research Group of the National Cancer Institute’s Early Detection Research Network (EDRN) has contributed to the progress in addressing these concerns. The strong focus on biomarker application optimizes the development of biomarkers with clinical utility as well as the early adoption of disruptive technologies, such as MRI imaging, into biomarker development workflows. Likewise, efforts to validate findings from laboratories outside of the EDRN, such as polygenic risk scores and capture of in-depth data from clinical cohorts provide unique resources to the biomarker community. For more information, see the article beginning on page 2454.
