HIGHLIGHTS

1767 Selected Articles from This Issue

COMMENTARIES

1769 Applying the Strategic Planning Process to a Large Research Consortium: The Example of the National Cancer Institute Cohort Consortium
Chinonye E. Harvey, Susan M. Gapstur, Camille A. Pottinger, Joanne W. Elena, and Kathy J. Helzlsouer

1775 Advances in Understanding Early-Onset Colorectal Cancer
Richard B. Hayes
See related articles, p. 1785 and p. 1792

MINIREVIEW

1778 Evidence of the Feasibility and Preliminary Efficacy of Oncology Financial Navigation: A Scoping Review
Meredith J. Doherty, Bridgette Thom, and Francesca Gany

RESEARCH ARTICLES

1785 Hereditary and Inflammatory Bowel Disease-Related Early Onset Colorectal Cancer Have Unique Characteristics and Clinical Course Compared with Sporadic Disease
Arif A. Arif, Daljeet Chahal, Gale K. Ladua, Eric Bhang, Bill Salt, Greg Rosenfeld, Jonathan M. Loree, and Fergal Donnellan
See related commentary, p. 1775

1792 Metabolic Risk Factors Associated with Early-Onset Colorectal Adenocarcinoma: A Case-Control Study at Kaiser Permanente Southern California
Andrew J. Schumacher, Qiaoling Chen, Vikram Attaluri, Elisabeth C. McLemore, and Chun R. Chao
See related commentary, p. 1775

Donald Haverkamp, Stephanie C. Melkonian, and Melissa A. Jim

1807 Factors Explaining Socio-Economic Inequalities in Survival from Colon Cancer: A Causal Mediation Analysis

1816 Adherence to the World Cancer Research Fund/American Institute for Cancer Research Cancer Prevention Recommendations and Colorectal Cancer Survival
Rui Song, Joshua Petimar, Molin Wang, Fred K. Tabung, Mingyang Song, Li Liu, Dong Hoon Lee, Edward L. Giovannucci, Xuehong Zhang, and Stephanie A. Smith-Warner

1826 Prenatal Diethylstilbestrol Exposure and Cancer Risk in Males

1834 Cohort Selection In Utero against Male Twins and Childhood Cancers: A Population-Based Register Study
Tim A. Bruckner, Ralph Catalano, Abbery Das, and Yunxia Lu

1841 Prenatal and Perinatal Factors and Risk of Cancer in Middle and Older Adulthood among Men
Benjamin C. Fu, Ilkiana M. Chowdhury-Paulino, Edward L. Giovannucci, and Lorelei A. Mucci

1846 Associations of Subtype and Isomeric Plasma Carotenoids with Prostate Cancer Risk in Low-Income African and European Americans
Sang-Ah Lee, Qiuvin Cai, Adrian A. Franke, Mark Steinwandel, Jie Wu, Wanqing Wen, Wei Zheng, William J. Blot, and Xiao-Ou Shu

1978  Cigarette Smoking and Estrogen-Related Cancer—Reply
John A. Baron, Hazel B. Nichols, and Stephen Safe

ABOUT THE COVER

The cover image is adapted from Figure 1 in the article, “Characteristics and outcomes of over 300,000 COVID-19 individuals with history of cancer in the United States and Spain,” by Roel and colleagues. The figure shows the prevalence of baseline conditions among patients with a history of cancer diagnosed and hospitalized with COVID-19. Given that COVID-19 is a novel disease, large descriptive studies are needed to inform public health strategies and clinical care, as well as to provide the groundwork for etiological studies. In addition, large studies with detailed information of medical conditions and health outcomes, such as thromboembolic events, in patients with cancer and COVID-19 are lacking to date. To fill that gap, the authors described the demographics, cancer subtypes, comorbidities and 23 outcomes of patients with a history of cancer and COVID-19. In addition, patients with a history of cancer hospitalized with COVID-19 were compared to: i) patients with a history of cancer diagnosed with COVID-19; and ii) patients with a history of cancer hospitalized with seasonal influenza (2017–2018) as a benchmark. Patients with a history of cancer and COVID-19 had multiple comorbidities and a high occurrence of COVID-19-related events. Hematological malignancies were frequent. For more information, see the article beginning on page 1884.
