HIGHLIGHTS

1599 Selected Articles from This Issue

COMMENTARIES

1601 Metabolomics as a Tool for Biomarker Discovery in Gastric Cancer
David A. Drew, Samuel J. Klempner, and Andrew T. Chan
See related article, p. 1634

1604 Scratching Below the Ovarian Cancer GWAS Surface
Lauren C. Peres and Alvaro N. Monteiro
See related article, p. 1669

CANCER SURVEILLANCE RESEARCH

1607 Incidence and Mortality of Cancers of the Biliary Tract, Gallbladder, and Liver by Sex, Age, Race/Ethnicity, and Stage at Diagnosis: United States, 2013 to 2017
Taylor D. Ellington, Behnoosh Momin, Reda J. Wilson, S. Jane Henley, Manxia Wu, and A. Blythe Ryerson

RESEARCH ARTICLES

1615 Excess Mortality in a Nationwide Cohort of Cancer Patients during the Initial Phase of the COVID-19 Pandemic in Belgium
Geert Silversmit, Freija Verdoodt, Nancy Van Damme, Harlinde De Schutter, and Liesbet Van Eycken

1620 Updated Methodology for Projecting U.S.- and State-Level Cancer Counts for the Current Calendar Year: Part I: Spatio-temporal Modeling for Cancer Incidence
Benmei Liu, Li Zhu, Joe Zou, Huann-Sheng Chen, Kimberly D. Miller, Ahmedin Jamaal, Rebecca L. Siegel, and Eric J. Feuer

Sally Peprah, Eric A. Engels, Marie-Josopine Horner, Analise Monterosso, H. Irene Hall, Anna Satcher Johnson, Ruth M. Pfeiffer, and Meredith S. Shiels

1634 A Prospective Investigation of Circulating Metabolome Identifies Potential Biomarkers for Gastric Cancer Risk
Xiang Shu, Hui Cai, Qing Lan, Quyn Cai, Bu-Tian Ji, Wei Zheng, and Xiao-Ou Shu
See related commentary, p. 1601

1643 Circulating Fatty Acids Associated with Advanced Liver Fibrosis and Hepatocellular Carcinoma in South Texas Hispanics

1652 Prolactin and Risk of Epithelial Ovarian Cancer
Cassandra A. Hathaway, Megan S. Rice, Mary K. Townsend, Susan E. Hankinson, Alan A. Arslan, Julie E. Buring, Göran Hallmans, Annika Idahl, Laura D. Kubzansky, I-Min Lee, Eva A. Lundin, Patrick M. Sluss, Anne Zeleniuch-Jacquotte, and Shelley S. Tworoger

1660 Genital Powder Use and Risk of Epithelial Ovarian Cancer in the Ovarian Cancer in Women of African Ancestry Consortium

LETTER TO THE EDITOR

Beta-blockers and Breast Cancer—Letter
Boris Mravec

ABOUT THE COVER

The cover image is adapted from Figure 2 in the article "Genetic analysis of functional rare germline variants across nine cancer types from an electronic health record linked biobank," by Shivakumar and colleagues. The figure shows a waterfall plot with pathways (x-axis) that were significantly associated with cancer (y-axis) and were replicated in either replication or TCGA. Rare variants play an essential role in the etiology of cancer. In this study, the authors aimed to characterize rare germline variants that impact the risk of cancer. The authors conducted an exome-wide rare-variant analysis to find novel genes and pathways associated across nine cancers. They replicated many genes and pathways that were known to be associated with cancers. Some of the significant genes in this study were linked to the pathways that were also significantly associated with cancers, which could potentially aid in understanding the mechanism of gene action. The genes and pathways discovered in this study could eventually be used to screen for high-risk cancer patients and personalized therapy. For more information, see the article beginning on page 1681.
