# Table of Contents

## Highlights

1599  Selected Articles from This Issue

## Commentaries

1601  Metabolomics as a Tool for Biomarker Discovery in Gastric Cancer  
David A. Drew, Samuel J. Klempner, and Andrew T. Chan  
See related article, p. 1634

1604  Scratching Below the Ovarian Cancer GWAS Surface  
Lauren C. Peres and Alvaro N. Monteiro  
See related article, p. 1669

## Cancer Surveillance Research

1607  Incidence and Mortality of Cancers of the Biliary Tract, Gallbladder, and Liver by Sex, Age, Race/Ethnicity, and Stage at Diagnosis: United States, 2013 to 2017  
Taylor D. Ellington, Behnoosh Momin, Reda J. Wilson, S. Jane Henley, Manxia Wu, and A. Blythe Ryerson

## Research Articles

1615  Excess Mortality in a Nationwide Cohort of Cancer Patients during the Initial Phase of the COVID-19 Pandemic in Belgium  
Geert Silversmit, Freija Verdoodt, Nancy Van Damme, Harlinde De Schutter, and Liesbet Van Eycken

1620  Updated Methodology for Projecting U.S.- and State-Level Cancer Counts for the Current Calendar Year: Part I: Spatio-temporal Modeling for Cancer Incidence  
Rennmei Liu, Li Zhu, Joe Zou, Huann-Sheng Chen, Kimberly D. Miller, Ahmdin Jemal, Rebecca L. Siegel, and Eric J. Feuer

Sally Peprah, Eric A. Engels, Marie-Joséphine Horner, Analise Monterosso, H. Irene Hall, Anna Satcher Johnson, Ruth M. Pfeiffer, and Meredith S. Shiels

1634  A Prospective Investigation of Circulating Metabolome Identifies Potential Biomarkers for Gastric Cancer Risk  
Xiang Shu, Hui Cai, Qing Lan, Quyn Cai, Bu-Tian Ji, Wei Zheng, and Xiao-Ou Shu  
See related commentary, p. 1601

1643  Circulating Fatty Acids Associated with Advanced Liver Fibrosis and Hepatocellular Carcinoma in South Texas Hispanics  

1652  Prolactin and Risk of Epithelial Ovarian Cancer  
Cassandra A. Hathaway, Megan S. Rice, Mary K. Townsend, Susan E. Hankinson, Alan A. Arslan, Julie E. Buring, Göran Hallmans, Annika Idahl, Laura D. Kubzansky, I-Min Lee, Eva A. Lundin, Patrick M. Sluss, Anne Zeleniuch-Jacquotte, and Shelley S. Tworoger

1660  Genital Powder Use and Risk of Epithelial Ovarian Cancer in the Ovarian Cancer in Women of African Ancestry Consortium

Association between Human Polyomaviruses and Keratinocyte Carcinomas: A Prospective Cohort Study

LETTER TO THE EDITOR
Beta-blockers and Breast Cancer—Letter
Boris Mravec

ABOUT THE COVER
The cover image is adapted from Figure 2 in the article "Genetic analysis of functional rare germline variants across nine cancer types from an electronic health record linked biobank," by Shivakumar and colleagues. The figure shows a waterfall plot with pathways (x-axis) that were significantly associated with cancer (y-axis) and were replicated in either replication or TCGA. Rare variants play an essential role in the etiology of cancer. In this study, the authors aimed to characterize rare germline variants that impact the risk of cancer. The authors conducted an exome-wide rare-variant analysis to find novel genes and pathways associated across nine cancers. They replicated many genes and pathways that were known to be associated with cancers. Some of the significant genes in this study were linked to the pathways that were also significantly associated with cancers, which could potentially aid in understanding the mechanism of gene action. The genes and pathways discovered in this study could eventually be used to screen for high-risk cancer patients and personalized therapy. For more information, see the article beginning on page 1681.
