

SUPPLEMENTARY MATERIAL

Supplementary Table 1. Final subject counts from 10 studies used for association analysis

Supplementary Table 2A. Association results for 106 *JAZF1* SNPs in 10,286 prostate cancer patients and 9,135 controls

Supplementary Table 2B. Association results for 106 *JAZF1* SNPs in 4,597 patients with aggressive prostate cancer and 9,065 controls

Supplementary Table 2C. Association results for 106 *JAZF1* SNPs in 4,514 patients with non-aggressive prostate cancer and 9,065 controls

Supplementary Table 3. Prostate cancer risk association of rs10486567 across different sub-studies
