

Supplementary figure legends

Supplementary figure 1: shows Spearman's correlation coefficients for comparisons of the rank order of analyte concentrations between T3 EDTA plasma and T3 heparin plasma for Bio-Rad (panel A) and Millipore (Panel B). Correlation coefficients are also shown for comparisons between Bio-Rad and Millipore for T3 EDTA plasma samples (panel C).

Supplementary figure 2: Differences in intraclass correlation coefficients (ICC) between T3 EDTA plasma and T3 heparin plasma are shown for Bio-Rad (panel A) and Millipore (panel B). Panel C shows differences in ICC between Bio-Rad and Millipore for T3 EDTA plasma samples.

Supplementary Figure 2: Comparison of intraclass correlation coefficients for T3 EDTA plasma vs. T3 heparin plasma for Bio-Rad and Millipore and for Bio-Rad vs. Millipore for T3 EDTA plasma
